

I Believe in the entire XM community. If you don't like it why then did it get allowed to start in the first place???? They are correct in saying that just because you don't like seeing the succes xm has brought about does not make it right to try and quash them!

I am a true hard working AMERICAN that should be able to CHOOSE the format of radio that I prefer to listen to!!!! I got completely fed up with the "local" stations all playing exactly the same music on all what 6 stations here in milwaukee, that I did something about it and believed in the satellite possibilities. Why shouldn't I be able to pick what I want to hear???

You lobbyists or whatever, need to go about attacking other avenues and leave the satellite radio communities alone!!!

KEEP SATELLITE RADIO ALIVE AND KICKING  
DON'T CENSOR MY FREEDOM
